

W3Partnership consultants have had years of experience in integrating our clients applications. Our on-site development services are flexible and can be tailored to meet specific needs and underpin existing projects. Whether you want help in setting up environments, assistance in deploying applications, or a consultant to oversee or mentor your development project teams; we have the skills and experience to help.

Objectives

- To provide development expertise for your Middleware environments covering:
 - IBM Integration Bus
 - IBM DataPower
 - IBM MQ
 - WebSphere Application Server
 - WSO2 ESB
 - WSO2 API Manager
 - Mulesoft Cloud or On Premise Runtime (ESB)
 - Mulesoft API Manager

Approach

- **Patterns:** W³Partnership has established patterns and tooling (for the development of Service Oriented Architectures or simple integration projects – see [W3 Pattern Application Developer \(W3PAD\)](#))
- **Flexibility:** W³Partnership can smooth out the highs and lows in development effort with certified WebSphere development consultants; this may include skills transfer, mentoring and product training
- **Cost Effective:** Choose from time and material or fixed price models to suit the nature of the project being undertaken.
- **Control:** Service delivery management ensures a smooth translation of requirements into solution.

Key Issues

- Are you targeted with delivering Integration development projects?
- Find it difficult to find suitably qualified personnel?
- Do you need to present cost effective solutions to the board?
- Do you require a flexible solution to meet the peaks and troughs of development projects?

Benefits

- Get the job done
- Consistent delivery of Integration projects
- Cost saving through reuse of middleware investment.
- Flexibility for cost control
- Qualified, skilled and experienced Integration expertise.

Deliverables

- Code
- Documentation
- Designs
