

**W3 Partnership will review your IBM IIB and IBM ACE performance and assess the key performance and security parameters of your installation to help you realise the full value of your infrastructure.**

## The Objectives

**Verification:** To verify the implementation and installation of IIB/ACE against best practices.

**Performance:** To identify any flaws or gaps in implementation that can affect availability and performance.

**Optimisation:** Ensure that key parameters are set appropriately in order to optimize usage and meet key business imperatives.

## The Approach

**Review:** To establish the current state of the implementation, documentation is reviewed on-site, along with the IIB / ACE installation and configuration parameters.

**Comparison:** The results of the review are analysed and compared to established best practices.

**Recommendations:** Several recommendations are developed to improve the implementation of the IIB / ACE according to their priority.

## Key Issues

- IIB /ACE is not optimised effectively.
- Middleware does not supporting business objectives.
- IIB /ACE is currently a bottleneck
- Security vulnerabilities that need addressing

## Benefits

- Independently validated best practice assessment for WMB/IIB implementation.
- Plan for optimal performance from WMB/IIB investment.
- A costed business justification for additional expenditure based on increased business value.

## Deliverables

- On-site / remote audit and analysis
- 2- hour interactive workshop
- Set of recommendations and proposed next actions
- Advice on additional WebSphere products/options required to fulfil a need in your environment.
- Implementation (optional)

W3 Partnership uniquely provides solutions and services that help organisations make sense of their digital applications and services, through integrated platforms and patterns. We are in a position to design, develop, host, manage and monitor such platforms.
