W3Partnership consultants are experts in implementing and installing IBM Integration Bus (IIB). Installing and configuring IIB can be a complex and time consuming process, our team can support you through the entire process.

The Objectives
Scope: To identify potential technical issues during installation and subsequent configuration.

Installation Planning: To provide a high level plan identifying responsibilities and dependencies.

Implementation: Install and configure IBM IIB to meet business needs.

The Approach
W3 Partnership consultants facilitate a one-day on-site / remote analysis of the current application and connectivity requirements.

The topics covered can be tailored to suit individual business needs, they include, but not limited to:

- Training requirements
- Project dependencies
- Customisation
- Environment architecture
- Interoperability
- Resilience
- Message volumes
- Security features
- Installation

Key Issues
- Wider impact on your systems and integration architecture
- Re-training requirements
- Confusion over new features
- Impact on current features

Benefits
- Improved resource planning
- Clear cost estimating
- Clear vision of the interdependencies
- Clear assessment of technical risks
- Understanding of training required

Deliverables
- On-site / remote audit and analysis
- 2- hour interactive workshop
- Set of recommendations and proposed next actions
- Advice on additional WebSphere products/options required to fulfil a need in your environment.
- Implementation (optional)

W3 Partnership uniquely provides solutions and services that help organisations make sense of their digital applications and services, through integrated platforms and patterns. We are in a position to design, develop, host, manage and monitor such platforms.
