W3Partnership consultants have had years of experience in integrating client applications. The on-site and remote development services we offer are flexible and can be tailored to meet specific needs and underpin existing projects.

Whether you need assistance setting up environments, assistance deploying applications, or a consultant to oversee or mentor your development project teams, we can assist.

The Objectives

To provide development expertise for your Middleware environments covering:

- IBM Integration Bus
- IBM DataPower
- IBM MQ
- WebSphere Application Server
- Mulesoft Cloud or On Premise Runtime (ESB) Mulesoft API Manager

The Approach

Patterns: W3 Partnership has established patterns and tooling for the development of Service Oriented Architectures integration projects.

Flexibility: We can smooth out the highs and lows in development effort with certified WebSphere development consultants; this may include skills transfer, mentoring and product training.

Control: Service delivery management ensures a smooth translation of requirements into a viable solution.

Key Issues

- Resourcing and recruitment issues
- Efficiency drive
- Lack of flexibility in resourcing

Benefits

- Consistent delivery of Integration projects
- Cost saving through reuse of middleware investment
- Cost control flexibility - Choose from time and material or fixed price models to suit the nature of the project being undertaken.
- Qualified, skilled and experienced Integration expertise

Deliverables

- Code
- Documentation
- Designs

W3 Partnership uniquely provides solutions and services that help organisations make sense of their digital applications and services, through integrated platforms and patterns. We are in a position to design, develop, host, manage and monitor such platforms.
